ORGANISATION NEWSROOM

- Aim: change newsrooms to be digital-facing and responsive to audience needs, rather than medium-driven
- Involves three pillars:
- **1. New newsroom tech** including a new custom built CMS called CosMoS and an upgraded print system (Good News 4 / Tera)
- **2. Changes to workflows**. Earlier starts. Filing for web. Understanding the value of content for subscribers.
 - Internal wire service to foster collaboration between newsrooms: up to 200 stories a day for group use.
- 3. Improving print processes and efficiencies to ensure sustainability

ORGANISATION | PRINT CHALLENGES

- High cost of petrol and high distances between drops (either retail or subscribers) – leads to high transportation costs
- High unemployment rates
- Depressed economy leading to less frequent retail shopping and smaller baskets
- High input costs of print and significant increases in the cost of newsprint

ORGANISATION PRINT SOLUTIONS

3 key developments in our print environment:

- 1) Increased **investment** in our informal (streets) sales network to ensure that the paper is available for purchase even when people are not shopping
- 2) **Consolidation** of our retail and subscription contractors in Gauteng province, to enable us to achieve economies of scale: two previously separate networks are now combined, so a subscriber delivery route now includes several retail drops
- 3) Constant **optimisation of pagination**: daily changes to print orders and based on ad ratios, anticipated sales demand, and distribution cost
